Tina Leger

A Business Born From Need

Founder of *Settled In By Tina*, Tina Leger, developed her passion for helping seniors and other families transition with minimal effort and stress started with her own family member, a cousin, in need of moving to an assisted living facility. She soon discovered the gap in assistance and lack of resources to help the process move along smoothly. Tina's personal experience with her cousin taught her invaluable lessons in all the vital, large and small details in transitioning and downsizing.

It was during that experience that Tina was approached by an administrator at her cousin's community, expressing a wish that there was a professional coordinator that could help all their clients feel more at home sooner with less anxiety. Tina decided then and there to build a company that could offer ALL aspects of moving services and "settle you in". Hence *Settled In By Tina* was born.

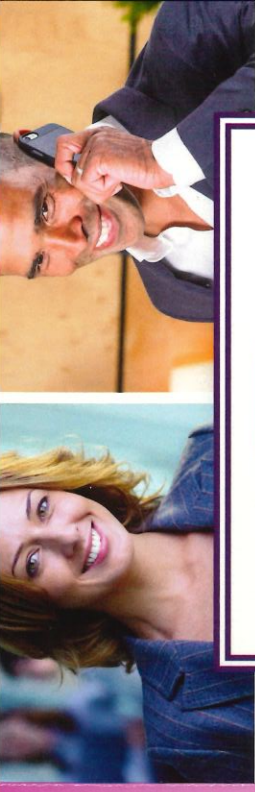

Tina is happily married with three adult children. Her son, Jackson, works with her and is an important part in the success of her business.
